

ID	Type	Section	Observation
UI-001	UI Improvement	Navbar	The spacing between the logo icon and the "Spurvancelak
			The primary CTA button appears relatively small compared to the headline and content, reducing its visual prominence.
UI-002	UI	Hero	
			The "Learn More" CTA button appears visually cut off at the bottom, resulting in an incomplete button shape and inconsistent appearance.
UI-003	UI	Hero	
		Introducing Cyber Community Pakistan	The section introduces "Cyber Community Pakistan" without sufficient context, making it difficult for first-time visitors to understand its relationship with the company.
UX-002	UX		
		Workflow /Services	The workflow highlights development technologies but does not communicate software testing/QA capabilities, which may leave visitors unaware of the company's complete service offerings.
UX-003	UX		
		Trusted by Industry Leaders	The vertical spacing around the section appears inconsistent. The top padding is noticeably smaller than the bottom padding, making the section feel visually unbalanced.
UI-003	UI		
		Our Services	The " Learn More " text is clickable, but it does not stand out enough as a clickable element.
UX-004	UX Recommendation		
		Why Choose Us	The statistics (10+ Years Experience, 500+ Projects Completed, 98% Client Retention) are repeated even though similar information has already been presented in the " By the Numbers " section. This repetition increases the amount of content without providing additional value and may reduce user engagement.
UX-004	UX		

UI-006	UI	Why Choose Us	The right side contains only three cards, making the layout appear slightly empty compared to the left side.
UI-005	UI	Why Choose Us	The feature cards begin at the same vertical level as the heading, making the two-column layout appear slightly rigid.
UI-010	UI	Our Network Ecosystem	The visual balance of the section appears inconsistent, as the image occupies significantly less space than the accompanying text, making the layout feel text-heavy.
UX-012	UX	Testimonials	The testimonials section displays multiple testimonials simultaneously, making the section appear visually dense and increasing the amount of information users need to process at once.
UI-013	UI	Contact Section	The right-side contact information container appears noticeably smaller than the adjacent contact form, resulting in an unbalanced visual layout.
UX-014	UX	Overall Landing Page	The landing page contains a large amount of content and multiple lengthy sections, which may increase cognitive load and reduce user engagement as users need to scroll extensively to reach the end of the page.

SERVICES

ID	Type	Section	Observation
----	------	---------	-------------

UI-001	UI	Hero	The hero heading occupies a relatively narrow width, leaving significant unused space on both sides, which makes the layout feel less balanced.
UX-001	UX	Hero Cards	The overlapping card layout makes the background cards difficult to notice, as there is no visual cue indicating that multiple cards are available.
UX-002	UX	What We Offer	The service cards contain lengthy descriptions, making the section appear text-heavy and reducing content scannability.
UX-003	UX	What We Offer	The service cards appear more visually organized on hover, while the default state feels text-heavy and less structured.

ABOUT

UX-001	UX	About Page	The About page lacks sufficient company information and does not clearly communicate the company's identity to visitors.
--------	----	------------	--

INTERNSHIPS

UX-002	UX	Hero Section	The hero section contains excessive text, which makes the section feel crowded and reduces the user's ability to quickly understand the main purpose of the internship page.
--------	----	--------------	--

JOB

UI-001	UI	Find Your Jobs (Search Bar)	The search icon inside the search bar is placed too close to the left edge, making the input field appear visually cramped and reducing overall alignment consistency.
--------	----	-----------------------------	--

PRODUCTS

ID	Type	Section	Observation
UX-001	UX	Hero	The hero section appears visually crowded due to the amount of content displayed at once, reducing readability and making it difficult for users to focus on the primary message.
UI-002	UI	Hero	The " Our Products " pill at the top does not contribute meaningful value and appears visually unnecessary.
UI-003	UI	Hero	The three informational cards below the hero content make the section feel overcrowded and visually heavy.

UI-004	UI	Products	The product cards are relatively tall due to lengthy content and spacing, making the section appear text-heavy.
UX-005	UX	Call-to-Action Section	The " Ready to Start Your Journey " CTA section is repeated on multiple pages, creating unnecessary content duplication and reducing the uniqueness of the page.

CONTACT

ID	Type	Section	Observation
UI-001	UI	Contact Hero	The light/glow effect behind the text on the left side is visually distracting and reduces text comfort, making the section slightly harsh on the eyes.
UI-002	UI	Contact Information Section	The text inside the right-side contact information container is positioned too close to the left edge, making the content appear cramped and reducing visual balance.

RESPONSIVENESS

ID	Type	Section	Observation
RWD-001	Responsive UI	Hero (Mobile View)	The hero section content is not properly center-aligned on mobile screens, resulting in an unbalanced layout.
RWD-002	Responsive UI	Workflow (Mobile View)	The Workflow section content appears too close to the left and right edges on mobile screens, leaving insufficient horizontal padding.

RWD-003	Responsive UI	Why Choose Us (Mobile View)	The content alignment in the Why Choose Us section appears inconsistent on mobile screens.
RWD-004	Responsive UI	Featured Projects (Mobile View)	The Featured Projects carousel/cards appear overly stretched on mobile screens, making the layout look disproportionate.
ID	Type	Section	Observation
RWD-T001	Responsive UI	Hero (Tablet View)	The hero section content is positioned too close to the left side on tablet screens, resulting in an unbalanced layout.
RWD-T002	Responsive UI	Workflow (Tablet View)	The Workflow section content appears too close to the left and right edges on tablet screens, leaving insufficient horizontal padding.

Recommendation	Severity
Consider reducing the font size of the button text.	Low
Increase the button size or adjust its spacing to make it more noticeable.	Low
Ensure the button is fully rendered with consistent border radius and padding on all sides.	Medium (or Low if it doesn't affect usability)

Add a brief explanation describing what Cyber Community Pakistan is and how it relates to Spurvancelab.

Medium

If QA/Testing is one of the company's services, include it in the workflow or highlight it elsewhere on the landing page.

Low

Maintain consistent vertical spacing above and below the section to improve visual balance and design consistency.

Low

Use a more prominent design, such as a button or another clear visual cue, to make the CTA easier for users to notice.

Low

Replace the repeated statistics with unique information or key differentiators to keep the content fresh and engaging.

Low

Consider adding a fourth card or adjusting the spacing and sizing of the existing cards to achieve better visual balance.	Low
Add a small top margin so the cards start slightly below the heading, creating a more balanced and visually appealing layout.	Low
Increase the image size or adjust the text layout to create a more balanced visual composition.	Low
Consider presenting testimonials in a carousel or slider to reduce visual clutter and improve focus on individual customer feedback.	Low
Increase the width or overall size of the right-side container to create a more balanced and visually appealing layout.	Low
Consider simplifying the content, reducing unnecessary text, and prioritizing key information to create a more focused and engaging user experience.	Medium

Recommendation Severity

Increase the heading container width or optimize the layout to utilize the available horizontal space more effectively. Low

Add a visual indicator or interaction (e.g., carousel, animation, or partial card preview) to improve discoverability. Medium

Keep descriptions concise or provide a "Read More" option to improve readability and user engagement. Medium

Improve the default card layout by reducing visible text or enhancing spacing so the cards remain visually appealing even before user interaction. Low

Add a detailed company introduction section before the Teams section covering mission, vision, values, and background. Medium

Reduce the amount of text and keep the hero content focused on key information such as internship opportunities, benefits, and a clear call-to-action to improve readability and user engagement. Medium

Add appropriate left padding/margin between the icon and the input field to create better spacing and improve visual balance. Low

Recommendation	Severity
Simplify the hero section by reducing unnecessary content and emphasizing the key message and primary CTA.	Medium
Remove the "Our Products" pill to create a cleaner and more focused hero section.	Low
Remove or relocate the cards to another section to improve visual hierarchy and reduce clutter.	Medium

Reduce the card height by optimizing spacing and keeping the content more concise for better scannability.

Low

Remove this section from the Products page or replace it with page-specific content to avoid repetition.

Low

Recommendation	Severity
----------------	----------

Remove or reduce the background glow effect behind the text to improve readability and create a cleaner visual appearance.	Low
--	-----

Increase the left padding inside the container to provide adequate spacing and improve readability and overall alignment.	Low
---	-----

Recommendation	Severity
----------------	----------

Center-align the hero content and ensure consistent alignment across all mobile screen sizes.	Medium
---	--------

Add consistent horizontal padding to improve readability and maintain a balanced responsive layout.	Medium
---	--------

Center-align the
section content and
maintain consistent
spacing for better
visual balance. Low

Optimize the carousel
and card dimensions
for mobile devices to
improve visual
balance and usability. Medium

Recommendation	Severity
----------------	----------

Add appropriate horizontal spacing and align the hero content properly to create a balanced layout on tablet devices.	Medium
--	--------

Increase the left and right padding to improve readability and maintain consistent spacing across tablet layouts.	Medium
